

ROLLSTAR HOSE WINDER

Your Benefits

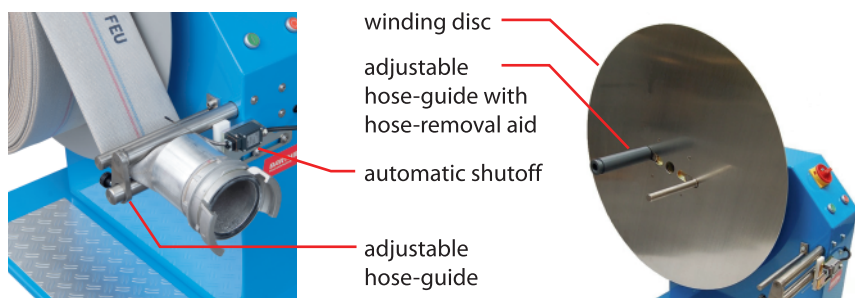

- + high safety standards
- + quick
- + comfortable
- + easy to use
- + mobile by chassis frame

THE HOSE WINDER FOR EVERY JOB

According to the equipment of several ROLLSTAR winders, you can wind hoses up to 75 mm (3") and 20 m (~66 ft) length as well as hoses up to 150 mm (6") 40 m (~131 ft) length safe and fast. The winding-bolts of the BARTH ROLLSTAR A-40 and 150 are adjustable, due to this feature all types of couplings up to 225 mm (8³/₄") can be winded.

EASY. FAST. SAFE.

The winder BARTH ROLLSTAR B-20, A-40 and the BARTH ROLLSTAR 150 are working automatically. Just place the coupling (stretched winding) or center-folded (dutch stile) hoseline in the bracket and press the start-button. Due to the hose-guide and automatic shutoff, the BARTH ROLLSTAR will fully automatically wind the hoseline until the coupling reaches the automatic shutoff. The BARTH ROLLSTAR CLASSIC will be operated by a foot-switch, so you have both hands free to lead the hose manually. A removing aid to simplify the removal of the winded hose from the bracket is included with every BARTH ROLLSTAR.

Specifications

	ROLLSTAR CLASSIC	ROLLSTAR B-20	ROLLSTAR A-40	ROLLSTAR 150
Product Code	156870	156871	156872	156873
Coupling sizes	up to Ø 75 mm (3")	up to Ø 75 mm (3")	up to Ø 110 mm (4 1/2")	up to Ø 150 mm (6")
Hose sizes	max. 20 m (~65 ft)	max. 20 m (~65 ft)	max. 40 m (~130 ft)	max. 40 m (~130 ft)
Winding disc	aluminium, Ø 550 mm	aluminium, Ø 550 mm	aluminium, Ø 900 mm	aluminium, Ø 900 mm
